31 JULY 1857

THUNDER STORM.

ST  
E  
Yesterday afternoon, <sup>31 July 1857</sup> about 3½ o'clock this city was visited by a very severe storm of rain, accompanied by heavy flashes of lightning and crashing peals of thunder. A few minutes preceding the rain, which poured down in torrents, quite a tornado passed over a portion of the City, which carried dust, straw, hay, and other light substances in a spiral form to a considerable height into the air. The trees in the neighbourhood of Queen, Church, Jarvis, Victoria and the adjoining streets, as also in Moss Park, were twisted about in most fantastic forms, and in some cases, large limbs were twisted off and carried a considerable distance through the air. A terrific black looking cloud followed this gust of wind, and was succeeded by a deluge of rain. The streets were shortly converted into rivers, the culverts and sewers were inadequate to carry off the waters, and we learn that many houses and much of the low grounds of the city were completely flooded, and it is feared considerable damage has been done. The inhabitants in some parts of the eastern end of the city had to get ingress to their houses by ladders to the upper floors.

Great Flood at Brampton.

<sup>25<sup>th</sup> August</sup>  
The Brampton Times, Extra, of Friday evening gives the following account of a great freshet at that place:

**IMMENSE FALL OF RAIN—BRAMPTON FLOODED.**—Last night such an immense fall of rain took place, that, early this morning, the River Etobicoke rushed down with fearful velocity, and so overspread its banks, that the greater portion of Brampton was flooded. Through the two railway bridges the water rushed into the principal streets, which were soon like rapid rivers. The water in several places in the village was above five feet deep. It went in at the windows of some houses. The damage done is considerable. The planks and sidewalks of some of the streets have been torn up, and small bridges in the neighborhood carried away. One house has been thrown on one side by the violence of the torrent. Business has been entirely suspended. The flood is now decreasing rapidly; so, by to-morrow, we expect Brampton will assume its usual appearance. It is acknowledged by all that this very unexpected immersion of our village is the worst yet experienced.

In consequence of our office having been, like many others, injured by the flood, we will be unable to publish the Weekly Times until Monday next.
