The University of Western Ontario

RESEARCH QUESTION

How well are the collections at Western Libraries meeting the needs of researchers in emerging inter-disciplinary programs such as the Collaborative Graduate Program in Migration & Ethnic Relations (MER)?

WHY CITATION ANALYSIS?

Analyzing citation characteristics from a body of scholarly literature can answer key questions about the types of resources researchers use, and can be a useful tool for uncovering patterns and themes in the “literature of” an inter-disciplinary field.

METHODOLOGY

1. Identify researchers affiliated with the MER Program: 32 from 12 departments (July 2009)
2. Collect publication data using a combination of SCOPUS, SSCI, and Google Scholar (limits: author/2003-)
3. Use RefWorks and Excel to manage and analyze citation data
4. Isolate Journal and Non-Journal reference types
5. Determine *key journals* as those cited 5 or more times – Also: identify contributing disciplines / subject areas (Ulrich’s); assign subject categories based on relevant Journal Citation Report (JCR) definitions
6. Categorize non-journal references as monographs or grey literature
7. Check key journals and monographs against Western Libraries holdings

OBJECTIVE #1

To identify the “literature of” MER.

RESULTS

PUBLICATION TYPE >11,000 CITATIONS

FREQUENTLY CITED KEY JOURNALS

MONOGRAPHS

- ✓ Remain an important source of information for MER researchers

GREY LITERATURE:

WIDE RANGE OF FORMATS AND TYPES

Most frequently cited

Government publications (Canada/US/INT/UK)	467
News Resources	145
Think Tank / Policy Institute Research Report	120
Conference proceedings	114
Dissertation or thesis	56

OBJECTIVE #2

To gain an understanding of patterns or themes in the literature of MER to guide collections.

Key Questions:

1. What disciplines does the literature draw upon?
2. What does it tell us about the age of the literature cited?

RESULTS

SUBJECT CATEGORIES IDENTIFIED THROUGH JCR

- Demography – 23 titles, 8 cited >5
- Ethnic Studies – 10 titles, 2 cited >5
- Planning and Development – 45 titles, 1 cited >5

Only 14% of core titles consistently cited

AGE OF COLLECTION USED BY MER RESEARCHERS

Rely on more recent vs. retrospective works

- >80% cited after 1980
- Parallels formal emergence of literature in Refugee Studies, formally established in 1982 (Skran, 2007)

OBJECTIVE #3

To identify gaps in holdings to make informed recommendations regarding collections and research support.

RESULTS

Western Libraries holdings

- ✓ 99% of key journals
- ✓ 83% of monographs

OBJECTIVE #4

To apply this methodology to assess and inform collections and research support for other interdisciplinary programs

IN PROGRESS

Environment & Sustainability

- data collected
- analysis pending

CONCLUSIONS

- ✓ Confirmed strength of collection support
- ✓ Demonstrated scope of MER literature used
- ✓ Support MER through colleague collaboration

Increase strength of liaison: Confidently make connections with faculty knowing we successfully support their research.

FUTURE DIRECTIONS

DISCUSSIONS WITH FACULTY:

- What are publication patterns in journals outside own discipline?

RESEARCH SUPPORT:

- Due to broad scope of subjects, when is collaboration necessary?

FURTHER INVESTIGATION INTO GREY LITERATURE:

- To what extent is it discoverable?
- How is it accessed?

METHODOLOGY:

- Refine and streamline
