Cartilage biology in osteoarthritis—lessons from developmental biology

Andrew A. Pitsillides & Frank Beier

Nat. Rev. Rheumatol. 7, 654–663 (2011); doi:10.1038/nrrheum.2011.129

In the version of this article initially published, the authors omitted to cite the original research papers by Zhang, Y. *et al.* and Zhang, Q. *et al.* showing that doublecortin is expressed by articular chondrocytes (*Biophys. Res. Commun.* **363**, 694–700 [2007]; *Genesis* **49**, 75–82 [2011]). These two papers have now been included in the HTML and PDF versions of the review.
