Get Tail End of Hurricane Here

A disastrous windstorm lashed across southern Ontario on Sunday, causing heavy property damage in many districts. A weather bureau official reported that the gale, which reached maximum gusts of 55 m.p.h. in many sections, and kept a steady 50 m.p.h. during its height, was actually the tail end of the hurricane which had struck Florida. The high velocity wind and cloudburst wrought damage to trees and corn crops throughout many districts. Hydro and telephone service was disrupted over a wide area, and servicemen were called out to repair wires at numerous points.

Roof Off Barn

Part of the roof was torn off the barn on the farm of Doug Speers, 5th line, Albion, near here. Several apple trees in his orchard were up-rooted and apples strewn around. Garage doors were ripped from their hinges and a rail fence was carried away, to be hurled into the bush several yards away. Mr. and Mrs. Speers were visiting relatives in Bolton at the time, and neighbors told them of the damage.

The silo on the farm of Jack Norris, near Macville, was blown over by the twister.

Telephone Lines Out

About forty lines of the Bolton Telephone Company were put out of order as a result of falling trees, and William Fines, linesman, and his assistants, Robt. Sharkey and Doug Sheardown, are having a busy time trying to repair the damage. A cable which supplies about 300 telephones south of here, was burned out by lightning. Mr. Fines said that work could not proceed in this section until cablemen were available to do the repairing.
