

**Date** : Tuesday, August 9, 1966

**Time** : 5:00PM EDT

**Location** : Hawkesbury, Prescott & Russell County

**F-Rating** : F? 'C'

**Track Length** : N/A

**Max Width** : N/A (narrow)

**Direction** : N/A° likely approx. W-E

**Shape** : N/A

**Injuries** : 0

**Deaths** : 0

**Damage Cost** : N/A, much of the damage indicated in newspapers is from lightning and hail. Possible tornado related damage to crops ("shredded corn") or tree related damage in the town of Hawkesbury.

**Notes** : Possible tornado hit the Hawkesbury area but no funnel known to have been witnessed. Crop damage included "shredded corn" although that could have been due to substantial hail which fell. Trees were uprooted in Hawkesbury but could have been straight-line winds or downburst, although a narrow path of damage was noted.

**Photos/Videos** : None in EC file. Newspapers have damage photos.
