Wind, rain, lightning, hail sweep area, damage not great

A sudden electrical storm accompanied by high winds and torrential rains and hail about 7 p.m. Tuesday tore roofs off barns and disrupted hydro services throughout the district, but Owen Sound escaped relatively unscathed.

An official at the Public Utilities Commission reports that the storm that lashed Owen Sound Tuesday evening did not cause any extensive damage to the electrical services.

Lightning damaged a transformer at the corner of 8th st. and 11th ave. e., and residents in that area were without power for about 15 minutes. A number of separate buildings in the city were without electricity for longer periods, up to 45 minutes when lightning knocked out individual power lines.

The city works department reported limbs from trees down all over the city, but no trees uprooted and no damage. Department superintendent, Duncan McLellan, said they will be busy all day Wednesday cleaning up the debris. City police reported no damage or no injuries.

Two trucks from the Owen Sound Fire Department answered an alarm caused by lightning tripping the switch at the Black Clawson storage facilities in the former Amerwood building on the Bay Shore road.

The fire department reported no fire and no damage to the building or contents and returned to the firehall about 7:30 p.m.

The Owen Sound OPP detachment reported that a tree which fell on Highway 6 and 10 just south of Rockford tore down high tension wires. Traffic was rerouted until the danger to motorists was removed by the work of hydro crews and the OPP. Lights in the area were out for about an hour.

About 6:30 p.m. lightning also tripped a switch in a bank on 2nd ave., causing the robbery alarm bell to ring. There was no attempt by anyone to enter the bank.

On the west shore hail stones as big as golf balls narrowly missed the Van Vught greenhouses which were extensively damaged by a similar storm a few years ago.

POWER OFF FOR 12 HOURS

A store owner in North Knapel reported Wednesday that the hydro was off for 12 hours and 10 minutes. The owner said "I have lots of mushy ice cream and sour milk here this morning."

A spokesman for Ontario Hydro said there were several areas out for 12 hours or more and falling trees caused by high winds were the main cause of the difficulties.

A spokesman for the Government of Canada weather office in Mount Forest said Wednesday that Tuesday's storm was the result of a low pressure area which moved up from the mid-western United States. He said the warm front had been set led over the Dakotas for a week.

The storm is reported fizzling out and moving through Quebec towards the east coast.

Temperatures throughout the area hovered around the 90 degree mark for the past week while the average mean temperature for June is in the mid 70's.

BARN DESTROYED

DUNDALK — At least five barns in the Portlaw area on the third line of Artemesia were either blown down or badly damaged in a wind and electric storm shortly after 7 p.m. One barn at Donald Smith's was completely wrecked and a second so badly damaged that it

will have to be demolished. The roof of a barn on the D.A. Fisher farm at Portlaw was partly torn off and the rafters ripped away. Part of the roof of Jim Wilkinson's barn in the same area was blown off.

In Osprey township, near Portlaw, the barn of Percy McMullen was badly damaged. The barn of John Teight about a mile north of Dundalk on highway 10 was levelled.

Near Portlaw eight large trees were blown down, disrupting hydro service. The garage of George Blakey was blown completely across to the other side of the road.

Near the Legion hall in Dundalk a large tree fell, cutting off hydro to houses. A ground wire in the Ron McCallum house nearby became overheated and the Dundalk fire brigade was called. The house was filled with smoke.

LIGHTING DESTROYS BARN

MOUNT FOREST — Lightning struck the 50 by 60 foot frame barn on the farm of Mr. and Mrs. John Campbell about four and a half miles south of Mount Forest in Arthur township and destroyed it completely shortly after eight o'clock Tuesday night.

Mrs. Campbell saw the smoke from the barn and ran to the telephone to call the Mount Forest Fire department only to find that the line was dead. A hurried trip to neighbours disclosed that all area telephones were out of service and Mrs. Campbell had to drive four miles to the home of their son before she could get a call through to Mount Forest.

The delay allowed the flames to gain devastating headway and the barn was a mass of flames by the time the Mount Forest firemen arrived. The cattle and pigs had been taken out by Mr. Campbell and the firemen kept the blaze from

Barn Wrecked Near Dundalk

JOHN TEICHT'S BARN on Highway 10, two miles north-west of Dundalk, was wrecked in the sudden windstorm on the evening of June 11, 1968. The roof and timbers fell down on a combine, sitting high on the barn floor.
