

Thesis Change Report

If your thesis is found acceptable with revisions/modifications required, please list the changes made after the examination below. Upon completion of these changes, designated members of your Thesis Examination Board will indicate that all changes have been satisfactorily completed by approving the thesis within Scholarship@Western.)

Page(s)	Description of Change
i	Change of wording
iv	Font change
X	Removed chemical formulae from abbreviations list, added additional abbreviations
1	Wording change
2	Wording change
3	Wording change
4	Example removed, new citation added
7	Wording change
9	Included physiology as a factor influencing refueling rate
10	Wording change regarding temperature, included additional background about factors that could influence migration speed
11	Included more explanation of nocturnal restlessness
15	Included additional information about stable isotope delta notation
16	Included additional explanation of WTSP range
20	Figure legend reworded
25	Additional technical information added about metabolite assays
32	Included additional background information about genetic analysis

33	Included methodology used to assess statistical model assumptions
35	Updated stopover duration analysis methods to reflect that only PC1 was used in the analysis as a weather index
37	Added capture timing range, removed interpretation of trend, included information regarding model assumptions
38	Change chart type from stacked to paired histogram
39	Change chart type from stacked to paired histogram
40	Change chart type from stacked to paired histogram
41	Included migration timing diagnostic plots
42	included information regarding model assumptions
43	Included table of body composition model results
44	included information regarding model assumptions
46	Changed figure to illustrate the 4 sex-morph class
48	Included departure date of last bird
53	included information regarding model assumptions
54	Altered figure caption for clarity
57	Included data set size from Stewart et al. 2002
58	Section 4.2 - wording change
61	Included additional information on factors that could influence migration speed
63	Altered wording to reduce interpretation of non-significant trends.
66	Removed "per-se"
72	Corrected journal name in the citation of Erni et al. 2002. "ResearchGate" → "Ardea"
94	Included appendix 3 with raw metabolite concentrations
